#### RADIATION PROTECTION AUTHORITY OF ZIMBABWE

### **RADIATION PROTECTION ACT (CHAPTER 15:15)**

# CHECKLIST FOR INSPECTION OF RADIOLOGICAL LABORATORY FACILITIES

# 

b.	Address:
c.	Telephone:
d.	E-mail:
e.	Licence number:
f.	Name and title of the responsible representative/legal person:

#### **B. AUTHORIZED OPERATORS**

A. GENERAL INFORMATION

Name	Title	Qualification/Certification

NB: Include RSO, Responsible	e Radiologist and other author	ized operators

## C. RADIATION DETECTING EQUIPMENT

Location Detector Type		Status	Detector		
			Model	S/N	Resolution
	14 6	1 . 1 /	ountry year)		

NB: Include Manufacturer details (country, year)

#### D. VERIFICATION OF RADIATION SAFETY

1. Facility Design and Shielding

		Yes	No
Facility Design			
Is current drawing of the laboratory	available?		
Was a safety assessment by a qualit to any modifications	fied expert performed prior		
Is there sufficient ventilation in the	laboratory		
Does the laboratory size meet the area?			
Are the sample drying ovens functioning properly?			
Are fume-hoods available?			
Laboratory Safety Control Mechan	ism		
Is the laboratory protected from	Provided?		
adverse environmental conditions (heat, moisture, etc)	Working?		
Is fire detection and protection in	Provided?		
the laboratory tested and working (tested periodically)	Working?		
Comments	(if		any)

# 2. Personnel Safety

Are personnel properly monitored for radiation exposure?	
ii) Is radioactive waste storage clearly labeled and away from work area?	
iii) Are appropriate protective equipment available and in use? E.g (lab coats, respirator masks, gloves and eye wear)	
iv) is eating and drinking clearly prohibited in restricted	

		l l	
v) Is the calibration check-source storage area clearly	W		
labeled and far from the workplace area	,		
Comments (if		any)

			J
3.Quality Assurance			
S. Quanty Assurance			
. Are sample receiving procedures available			
1 01			
i. Are sample receiving logs available			
ii. Are sample preparation procedures available and visible?			
iv. Are sample analysis procedure available and visible			
v. Are emergency procedures written and posted?			
vi. Are instrument control procedures available and posted nea	r their respe	ctive instrumen	.ts?
vii. Are results being dispatched in a reasonable period of time	??		
viii. Do laboratory equipment operators have the appropriate tra	uinina?		
	g:		
Comments			
4.Gamma spectrometer checklist			1

i.	Are instrument control manuals available posted near the instruments?		
ii.	Has the instrument been calibrated in the past year?		
iii.	Are instrument calibration records being kept		
iv.	Are validated sample analysis containers being used		
v.	Are instruments being operated by qualified personnel?		
vi.	Are instrument control procedures available and posted near their respective instruments?		
vii.	Are instrument maintenance and service records being kept?		
viii	Is backup power available for the instruments?		
ix.	Are all cables well secured and secured properly?		
Cor	nments (if		any)
••••			
•••••		•••••	

#### 5. Verification of Records

	Yes	No
a) Does the registrant/licensee display the authorization		
certificate?		
b) Are personal dosimetry records being kept?		
c) Are there laboratory local rules in place?		
d) Are normal operating and emergency procedures written		
and available for review by operators?		
e) Are radioactive waste disposal logs available?		

f)	Are weekly wipe test records kept?		
g)	Are weekly ambient dose records kept?
